

Name: AAVISHKAR SINGH AAVISHKAR SINGH | Reg. No: RA2511003011024

Unit “ 4 : Session “ 8 : SLO “ 1 | Micro-programmed Control “ Match the Following

■ I. Match the Following

1. Microinstruction “ A. Contains all control signals for one clock cycle.
2. Control Store “ C. ROM storing microprograms.
3. Nanocode “ B. Breaks microinstructions into smaller steps (a second, finer level of control encoding).
4. Microprogram “ E. Sequence of microinstructions.
5. Horizontal Microcode “ F. Each bit directly controls a signal (wide words, no decoding).
6. Vertical Microcode “ D. Uses multiple microinstruction formats (short, encoded words needing decoders).
7. Micro-PC “ G. Points to the next microinstruction.
8. Emulation “ H. Imitating complex instructions (one machine imitating another's ISA via microcode).
9. Dynamic Microprogramming “ I. Modifiable control store (writable control store).
10. Microsequencer “ J. Decides the next microinstruction address.
